What is probably the largest buck  
to be bagged during the present sea-  
son fell before Dr. O. B. Taylor's  
rifle Wednesday of this week. The  
animal weighed 118 pounds dressed,  
which means that it was SOME deer.  
There have been a large number of  
deer killed in this section this season  
but this, so far as we have learned,  
easily sets the pace in size.

Mrs. H. E. Haass and Mrs. Phil.  
Jagge were visitors in Castroville  
Thursday morning looking after the  
two small sons of Mr. and Mrs. H. V.

### ST. PAUL LUTHERAN CHURCH. Hondo, Texas.

What is the last thing a bootblack  
polishes? It is the sole. It is proper  
and in order for him to do it that  
way.

One of the last things many people  
think about is the soul. The body  
is well taken care of, the head is  
adorned with much good learning,  
but the soul, the spiritual life is left  
to the last as the least important. It  
should be in the opposite order.

"For what is a man profited if he  
shall gain the whole world, and lose  
his own soul? Or what shall a man  
give in exchange for his soul?" Matt.  
16, 26.

"Thou shalt love the Lord thy God  
with.....all thy soul." Matt. 22:37.  
"Seek ye first the Kingdom of  
God" should be the order in ones'  
spiritual life. Go to church and take  
care of your soul.

There will be service at St. Paul's  
Lutheran church Sunday, December  
6, at 10:30 in the English language.  
Sunday school and Bible Class will  
meet at 9:15. There will also be a  
night service beginning at 7:30.

The Luther League will have a  
business and devotional meeting at  
the church beginning at 6:30 P. M.  
Please note the time. All young  
people of the church are invited to  
attend, whether they belong to the  
organization or not. Miss Elvira  
Schweers will lead in the discussion  
of the topic, "The Church Year."

The young people of the church  
will conduct a Trade's Day next Wed-  
nesday, Dec. 9, at the Chamber of  
Commerce Hall. Refreshments and  
surprise Christmas parcels will be for  
sale. The young people wish to un-  
dertake some improvements for the  
church.

### PLENTY OF VENISON.

The Jagge family are all three  
deer slayers and this season finds  
them amply supplied with venison.

On November 21st Master Clinton  
killed his first for the season, a sev-  
en-prong buck.

On the 30th Mrs. Jagge went him  
a little better and bagged a 9-prong  
er.

We have no report on what "Old  
Man P. C." has done, but with so  
much nice venison it goes without  
saying that he has been busy feast-  
ing—for it is delicious enough to  
tempt anyone to feast; we were fa-  
vored with a share of it and know.

### REWARD.

A reward is offered for a woman  
named Mrs. Lucille Petry. A five  
dollar reward will be paid to the per-  
son who can find her and let Mr.  
Armin Carl Breiten know at Hondo,  
Texas. He will be glad to pay it right  
away to the person who can find her  
and also tell her to write to him at  
Hondo, Texas. His address is Box  
516, Hondo, Texas. 1tpd.

### I REMEMBER WHEN By French Billy de Salmes.

One morning in 1877 I was up  
town at Jack Harris' corner, Soledad  
and Commerce street, when I met  
August Hornung, deputy sheriff of  
Medina county, who asked if I want-  
ed to go to San Diego with him. He  
was going up there to get three negro  
convicts and bring them back for the  
pen.

I got my gun and met him and we  
left in an ambulance drawn by two  
gray horses. We had to go as cattle  
buyers.

In San Diego we got the prisoners,  
who came from Corpus Christi. Some  
Texas Rangers wanted to go along  
but we refused. We made 10 miles  
that evening, after eluding a mob  
that gathered to take the prisoners  
away from us.

That trip took us 14 days, and we  
had one lone .38 bullet between us  
for safety. We shot all our shells  
away on wild turkey en route to San  
Diego.

This clipping from a San Antonio  
paper was interesting to me, because  
I first knew Mr. August Hornung at  
that time. Was only about seven  
years old at that time. If you want  
to use it in your columns you may do  
so.

Yours truly,  
MRS. H. N. BURGIN.

### MEDINA COUNTY COUNCIL TO CONVENE.

The Medina County Council of the  
P. T. A. will convene at Devine, Tex-  
as, December 12th, at 2:00 P. M.

The local P. T. A. of Devine has  
arranged an elaborate program for  
the occasion, and expects every Par-  
ent-Teacher organization in the  
county to send delegates to the meet-  
ing. Teachers and trustees are urged  
to attend.

The Health Department of the  
State will have a representative at  
the meeting to discuss health condi-  
tions of the schools and state.

The musical numbers will be under  
the direction of artists who take  
pleasure to present their classes to  
the public. There is a treat in store  
for those who love music.

W. N. SAATHOFF,  
County Superintendent.

### WEATHER REPORT.

Weather Bureau.

Fresh fish and oysters every day  
in season. Favorite Cafe.

### MAKES A RECORD.

Master Elmer Joe Leinweber, the  
9-year-old son of Mr. and Mrs. Elmer  
Leinweber, has made a record which  
few Nimrods can eclipse for age and  
achievement.

On Friday of last week while out  
with his uncle, Howard Short, on the  
D. W. Short ranch he bagged his  
first deer, a 5-spiked buck. The  
young man did the work with a 12-  
gauge shotgun, and being somewhat  
leery of what might be the back-ac-  
tion of the gun, he sat down before  
aiming and firing so as to anticipate  
the necessity of falling should the re-  
coil be too much for his equilibrium.

On Saturday following he killed a  
turkey gobbler with a sixteen gauge  
shotgun, and on the next day bagged  
three wild ducks at one shot with a  
.410 shotgun.

After this Grandpa Short is se-  
riously thinking about slipping off on  
a hunt by himself to try to make a  
reputation too as a hunter!

### DO NOT MISS THE RECITAL.

One of the most inspiring, uplift-  
ing programs of the entire year will  
be presented Friday night at the  
Methodist Church. We are exceed-  
ingly fortunate to have the privilege  
of having the young people from our  
Methodist Orphans' Home at Waco  
as our guests for the evening.

You cannot afford to miss this  
rare opportunity. Come and bring  
your friends. It is free.

### ELITE BRIDGE CLUB.

The pretty home of Mr. and Mrs.  
Henry Windrow was the scene of a  
delightful bridge last Wednesday  
night when Mr. and Mrs. Windrow  
were hosts to the Elite Bridge Club  
and several additional guests. Large  
vases of chrysanthemums in the liv-  
ing room and dining room enhanced  
the charm of the home. Score pads  
and tallies carried out the Thanks-  
giving motif.

After a series of games had been  
played, it was found that Mr. and  
Mrs. Earl Lacy held high score for  
Club members, while Miss Hettie  
Nester held high for the guests.

Thanksgiving dainties were served  
at the conclusion of the games.

Those enjoying the bridge were  
Mr. and Mrs. Earl Lacy, Mr. and Mrs.  
Ed. Connevey, Mr. and Mrs. Meliff  
Lippold, Mr. and Mrs. Volney Boon,  
Mr. and Mrs. Robert Kollman, among  
the members; and Mr. and Mrs. F.  
Marion Davis of Throckmorton, Mrs.  
Robert Bendele, Miss Hettie Nester,  
Miss Doris Windrow and Dr. John  
Henry Meyer as additional guests.

### QUIHI NOTES.

"Tell ye the daughter of Zion, be-  
hold, thy King cometh unto thee."  
Matt. 21:5.

The Bethlehem Lutheran Sunday  
school and Bible class will meet Sun-  
day morning at 9:30 o'clock. A cor-  
dial invitation to be present is ex-  
tended to all.

Divine services will be held in  
Bethlehem Lutheran church Sunday  
as follows: In the German language  
at 10:30 A. M. and in the English  
tongue at 7 o'clock P.M. These Ad-  
vent Sunday services are very inter-  
esting. All are cordially invited to  
come.

For Thanksgiving Day service at  
Bethlehem Lutheran church the beau-  
tiful altar and pulpit were beautif-  
fully and elaborately decorated with a  
variety of garden and field products  
and a number of splendid bouquets.  
At the close of the service the infant  
daughter of Mr. and Mrs. Alfred C.  
Boehle received the sacrament of  
Holy Baptism. The little lady re-  
ceived the name of Helen Eileen and  
had as sponsors Mr. and Mrs. Otto A.  
Grell. After the service the event  
was duly and nicely celebrated with  
a fine Thanksgiving Day dinner at  
the home of Mr. and Mrs. Luebbe  
Boehle.

The Thanksgiving's Day commu-  
nity barbecue and program given at the  
Lutheran parish hall and lawn were a  
success in every particular. In  
spite of damp and chilly weather  
conditions the attendance was un-  
usually large; the whole countryside  
seemed to be present and apparently  
everyone enjoyed the good things of-  
fered and afforded. The musical-  
literary program at night was ex-  
cellent and elicited many favorable  
comments. County Superintendent  
of Schools climaxed the program with  
a happy and very interesting im-  
promptu address beginning with the  
first Thanksgiving celebration in  
America and ending with a "fill-up"  
at Castroville. The committee of ar-  
rangements deserves much credit for  
the dispatch and manner in which  
this celebration was managed.

On Sunday night, Dec. 13th, the  
Quihi Luther League will give its  
last literary-musical program for  
1931. This program will be both in-  
teresting and entertaining. The in-  
dividual numbers of this program will  
be announced next week.

Preparations for a fine Christmas  
celebration at Quihi Lutheran church  
on Christmas Eve are under way and  
promise to be interesting for old and  
young.

#### CHEVROLET'S NEW CAR.

Chevrolet's new car for 1932 goes on display today at dealer showrooms throughout the nation.

Embodying silent synchro-mesh transmission in combination with selective free-wheeling, a twenty percent increase in power, top speed of 65 to 70 miles an hour, streamlined bodies and a wealth of other new features, the new car remains in the price range of the current series, the

lowest at which a Chevrolet has ever sold.

Heralded as "The Great American Value for 1932", the car boasts more extensive changes than any annual Chevrolet model since the change-over to a six in 1928. Yet changes are mostly refinements over the basic design of the 1931 car which, from the standpoint of public acceptance, was the most successful in the history of the company, and brought Chevrolet first place in the industry during

the highly competitive market of the past twelve months.

Practically every proven automotive feature of recent years is incorporated in the new 1932 Chevrolet, as well as a new "stabilized" front end construction embodied for the first time on any car. Outstanding improvements in the 32 line over last year's models are down-draft carburetion, counter balanced crankshaft, smaller wheels and larger tires, radically changed front end appear-

ance, "finger touch" front seat adjustment, cowl ventilator on all models, hood doors instead of louvers, improved clutch and an additional cross member in the frame.

The 21 domestic plants are now busy producing the new line. The stimulus to employment in the Chevrolet organization, in affiliated Fisher Body plants and among independent suppliers made possible by the introduction of the car, it is conservatively estimated, will add to the

ings of 200,000 people.

Twelve standard body lines are in the line this year—three open and nine closed Fisher bodies—all in new color combination and all with smart new features. In addition, eight models also are available with deluxe equipment, making possible individuality of ownership and providing selection from twenty different types.

Of the mechanical changes, the outstanding one is the new trans-

mission unit, which is entirely Chevrolet-built and is said to combine for the first time in any car the combination of synchro-mesh with simplified free wheeling as standard equipment at no extra cost. Free wheeling is engaged at the discretion of the driver by a control button on the instrument panel. This optional feature enables the driver to utilize the full breaking power of the engine if he desires, and to use the free wheeling

**T**HE new Chevrolet Six comes out tomorrow! Its appearance strikes a smart new note in motor car styling. Its performance combines the greatest thrills of modern motoring. Its new features include many of the important developments in engineering and craftsmanship. It actually looks, feels, controls and performs like nothing you have ever associated with low price before.

A few of the outstanding highlights of this new car are listed above—a few of the typical advancements and improvements that make the new Chevrolet such a

remarkable low-priced automobile. And all of these new features are offered in twenty different models—each styled in a new and distinctive manner in keeping with the finest traditions of Fisher craftsmanship.

To develop such an outstanding automobile as the new Chevrolet Six at such low prices, Chevrolet has utilized every advantage of its present position as the world's largest builder of automobiles. And Chevrolet presents this new car—proud in the knowledge that it represents the Great American Value for 1932.

only when traffic conditions are desirable. The wheelbase remains at 29 inches, the car looks longer than last year, lower, speedier and more powerful—promises borne out by the greatly improved power plant. The most striking change in exterior appearance is the new front end, which has been completely redesigned this year. The new "stabilized" front end mounting is an important feature of the new car. In conventional mounting the radiator, fenders and headlights are supported from the sides of the frame, and in driving over rough roads the front end weaves and rattles. This is annoying to occupants of the car and frequently results in the origin of squeaks and rattles at points of stress. In the new Chevrolet, the fenders, radiator and headlights are carried by a single front support unit, which is anchored to the center of the front cross-member of the frame. This pivotal anchorage enables the front end to sway with the body as it moves, thus reducing the annoying rattle as well as the possibility of squeaks and rattles developing at points of stress. A double tie-bar, chromium plated, braces the fenders between the fenders and the radiator, thus acting as a structural unit as well as an ornament. A support also extends from the tie bar to the radiator, anchoring the units securely together, also bracing the horn. The radiator is entirely new in design and construction. The exposed area is larger than last year for better cooling, and a new grille is integral with the radiator in all models. This grille has square mesh, stamped in relief, with the vertical lines accentuated to increase the appearance of height. The radiator is chromium plated, and the top has a narrow bead and a top edge embellished only by the familiar Chevrolet emblem in blue and chrome. Front fenders have a deeper crown and a wider bead coming to a graceful point at the front tip of the fender. Headlamps, parabolic-shaped, with convex lens are fully chrome plated and are longer and wider than last year to emphasize the impression of speediness. Headlamps are mounted on the tie-bar, as the new trumpet-shaped horn, mounted externally beneath the left side lamp. Cowl lamps, similar in design to the headlamps though smaller, are mounted with all sport models and are mounted behind the chrome-plated cowl molding. The lenses of these lamps contain prisms which reflect the headlamp glare of approaching cars and afford a measure of protection for the car in the event the driver forgets to light the parking lamps. The hood is redesigned to conform with the new radiator shape and offers several radical departures from last year. The conventional panel of the hood is replaced by four ventilating doors on each side, chromium plated on the deluxe and sport models. This "big car" refinement enables the driver to control engine ventilation in relation to temperature. Each door has a chromium plated handle and a heavy spring to hold it in the desired position without rattling. Another improvement is the replacement of the usual two external latch catches with only one catch hinged internally. This type of latch is much neater in appearance and more conveniently operated. All models this year have cowl ventilators located just forward of the windshield and controlled by a lever in the driver's compartment. The windshields of all models are slanted at a sharper angle, and the streamlined bodies, with the outside visor eliminated, greatly reduce air resistance, increase the driver's vision and add to the symmetrical appearance of the car. The sloping front pillars—strengthened by a steel reinforcing structure—blend gracefully into the beautiful cowl top. Moulding lines are carried along the pillars and along the top of the top just over the doors and windshield. With the elimination of the outside visor, its previous function is assumed by an internal visor adjustable to any position and affording greater protection than the old external visor. Its elimination, together with the lowering of the top of the instrument panel, affords the driver greater vision, particularly in observing overhead signal lights. External body contours follow the same general design as last year, the obvious changes being in the new hardware and greater door height. Doors extend through the side sills instead of only to the top, and larger tires is to give a lower, racier appearance to the car when viewed from the side. Tire sizes are now 5.25-18 compared with 4.75-19 last year. In the rear are the combination tail and stop light, the safety gas cut away from the engine, with a side plate added to prevent flickering of the dash gauge and insure accurate readings under all conditions; rear fenders are redesigned, with upper crowns and lower rear ends, in contour and general treatment conforming with the new design of the front fenders. Body interiors bring a new conception of luxury to the low priced car. Mohair or broadcloth upholstery is now optional with all models; new, such fine car features as assist cords, robe rails, arm rests at both sides of the rear seat; dome light ash receptacles and many other improvements are standard on various models in the line. The instrument panel is beautified by the symmetrical grouping of the new instruments added this year because of added mechanical

features. The free wheeling control button is located just to the left of the steering column. Other instruments are grouped on the center panel, which has a deeper flange this year and a decorative bead harmonizing with the instrument design. A heat control button is added to this center panel, and all instrument dials have convex faces for easier reading. The top rail of the panel has been lowered and contains a removable inset ash tray, with a hinged cover for the convenience of front seat occupants. All closed models have a "finger touch" front seat adjustment, whereby, simply by touching a lever to the left of the seat, the seat may be quickly rolled to the most comfortable position back of the wheel and clamped there. The adjustment may be made while the seat is occupied. The headlamp dimmer switch, located on the left of the toe board, is improved for better operation; and the stop light switch also is improved and simplified, and may be adjusted by the driver to light at any point in the travel of the foot pedal. The motor which drives the automatic windshield wiper—standard on all models this year—is located at the center of the header board, inside the car. For the driver's convenience, the left front window has an equalizer, which reduces the effort necessary to raise or lower the window. The windshield regulator, of improved design, is located on the header bar. The open phaeton and roadsters have a decided custom-made appearance, with chromium plated mouldings along the front edges of the top. Both models have special provisions for storing side curtains and top. In the phaeton, the rear seat pivots forward to provide storage space for curtains. The rear seat also is more comfortable, and the kick pad at the rear of the front seat is now of carpet. The roadster top folds into a space in the body just back of the seat. A snap-on cover conceals the folded top and the arrangement eliminates the usual boot, giving the car a much racier appearance and affording greater comfort to rumble seat passengers. Easier riding and greater capacity is assured by improved springs, the front springs having increased camber and load-carrying capacity, and the rear springs in the roadster and coupe models having one more leaf than last year. The frame has an additional cross member and is redesigned in several points for greater efficiency and safety. A new type of engine suspension known as "diamond" mounting, because the points where the power plant is secured to the frame correspond to the corners of a diamond, is used. At the suspension points rubber insulation in a stamped container prevents metal to metal contact. This insulation effectively prevents road shocks from reaching the engine, dampens out vibration which otherwise might be communicated to the passengers, and at the same time provides a stable anchorage for the power plant. The sixty horsepower, over-head valve, six cylinder engine is smoother, quieter and more powerful, due to the cumulative effect of many reinforcements. The engine block is stiffened and strengthened by additional ribs and more metal at points of stress. Main crankshaft bearings are thinner, making possible an increase in diameter of the crankshaft journals. The crankshaft, with four counterweights, forged integrally, weighs 53 pounds, an increase of five pounds over last year. Lubrication to the crankshaft and camshaft bearings, and the valve stem is positive pressure this year, instead of splash feed as formerly. Improvements in timing valve opening and compression ratio contribute materially to the twenty per cent increase in power and to quicker acceleration. In addition to the new down-draft carburetor, a heat control valve has been added to the exhaust manifold to concentrate the hot exhaust gases on the intake manifold for easy starting and quick warming up of the engine at low temperatures. A button regulating the heat control is located on the instrument panel. An air dome has been added to the fuel pump, which assures constant feeding of fuel to the carburetor under all operating conditions and is especially effective for high speed driving or low engine temperatures. Air drawn to the carburetor passes through the combined air cleaner, intake silencer and flame arrester mounted on the top of the carburetor. Within the air cleaner an air resonance chamber has been built this year to reduce the "hiss" of incoming air, which at high speeds might otherwise be noticeable to occupants of the car. Cooling is improved, in addition to the larger radiator area, by increasing the amount of water at the exhaust ports of the engine, and by a new four-blade fan so designed that one pair of blades sets up vibrations of different frequency than the other pair, one canceling out the other, thus effecting unusually quiet operation. Refinements in the cushion-mounted clutch combine to insure smooth and extremely quiet operation, and freedom from squeaks, clatters and slippage. The transmission unit, incorporating the synchro-mesh principle and the over-running clutch or "selective" free wheeling is entirely new, and is said to be the first instance of any manufacturer offering the combined features to the motoring public. It is designed to meet the needs of modern traffic, and in operation it automatically permits the novice to shift gears smoothly and noiselessly. The synchro-mesh transmission follows the same general design as that used successfully during the past few years in other General Motors cars, although some parts have been heavily redesigned for greater safety in operation and

other minor changes have been made either for better performance or better to adapt the units to volume manufacturing. The new transmission insures easy, quiet and quick shifting from low to second, second to high, and high to second without gear clashing or without effort on the part of the driver to synchronize the engine speed with the forward motion of the car. An outstanding feature of this transmission is its safety, especially when descending hills necessitating a shift to second gear. This shift, usually made under difficult driving conditions, is easily and quickly made simply by releasing the clutch pedal and shifting the hand lever into second. The over-running clutch, manufactured entirely in Chevrolet plants, is assembled as an integral part of the synchro-mesh transmission and provides selective free wheeling in all forward speeds. The over-running clutch, as designed and manufactured by Chevrolet is very simple and consists of only three major operating parts. Inclusion of this feature, which permits the engine to idle independent of the forward speed of the car, lessens oil and gas consumption and is expected to assist materially in maintaining Chevrolet's established reputation for economical operation. The "selective" feature consists of a clutch sleeve splined to the front drive shaft. This sleeve may be moved to the rear to engage splines on the rear driven shaft by means of a push-and-pull control button located on the instrument panel. When the control button is pulled out the clutch sleeve engages both driving and driven shafts, locking them together positively, and enabling the driver to operate the car in the conventional manner. When this control button is pushed in, the automatic "coasting" mechanism is engaged and the car coasts free of the engine whenever the foot is removed from the accelerator. An ingenious new automatic device enables the driver to forget about the free wheeling control when shifting into reverse. Merely shifting the hand lever causes the reverse fork to move the clutch sleeve toward the rear, engaging both driving and driven members and providing positive drive in reverse. When the hand lever is again moved into a forward position the clutch is released automatically into its former free wheeling position. This feature relieves the driver of having to remember to shift into the conventional position before going into reverse, and of having to shift into the coasting position again before changing to a forward speed. He need only decide that he wants to "free wheel" and his safety is automatically provided for. The sum-total of changes in the new car make it not only distinctive addition to its price class, but a "big car" in appointments and mechanical improvements. From the enthusiastic comment of those who have had a preview of the new car, it is expected to prove a worthy successor to the highly successful lines of the past few years.

Mr. and Mrs. F. Marion Davis and little F. Marion, Jr., were called home to Throckmorton by a phone message Saturday morning informing them that the building in which they had their apartment was destroyed by fire at one o'clock Saturday morning. They left early Sunday morning and arrived to find that neighbors had saved much of their belongings from the flames, but they had lost several hundred dollars in wearing apparel and household goods. Marion bagged a six-prong buck just a few minutes before the bad news reached him in the woods where he was hunting, and with all his misfortunes had something still to regale his Throckmorton friends with on his return.

### COLONIAL COVERINGS.

A stellar cast of players is assembled in the Thrill-O-Drama "Bent For Frisco," an exciting story of a newspaper reporter's crusade against gangsters, which shows Saturday at the Colonial. Charley Delaney and Vera Reynolds head the cast which also includes such noted screen players as William Desmond, Carroll Nye, Wesley Barry and others. There are some truly remarkable shots of an automobile race around a board track during the course of which one of the cars turns over.

WILLIAM HAINES

Laughs are assured in advance of seeing "New Adventures of G. Rich-Quick Wallingford," opening Sunday at the Colonial Theatre, by a glimpse of the cast of the M-G-M comedy, which boasts a galaxy of funsters recruited from both screen and stage. William Haines plays the debonair J. Rufus Wallingford, beloved grafter of fiction. Sharing his adventures in high finance, trickery and comical tribulations are Jimmy "Schrozzle" Durante, who plays a riotous chauffeur, and Ernest Torrence. Leila Hyams supplies the heart interest. There is plenty of dramatic action in this story of a bunco artist who finds that honest business supplies just as good an outlet for his tricky art.

Those two outstanding Oriental, Anna Mae Wong and Sessue Hayakawa, are very much worthwhile in the Colonial Thursday and Friday, where they will be featured with Warner Oland, the original Fu Manchu, in a new episode of the fascinating Sax Rohmer series, filmed by Paramount as "Daughter of the Dragon." For those who like romance seasoned with puzzles, thrills and action evolved from lurking mystery, this production will talk right out and say big things to any movie audience. The scene of action spins from Limehouse, London's gray white way, and murky Thames river to luxurious estates of the titled. Supporting roles of note are enacted by Holmes Herbert, Frances Dade, Bramwell Fletcher, Nella Walker, Nicholas Saussanin and Lawrence Grant.

You write letters occasionally. Why not use printed stationery? We will furnish you a box of 200 note sheets and 100 envelopes, all neatly printed with your name and address, for only \$1.00. ## DON'T LET THEM FOOL YOU.

Beware of the fellow that tells you he prefers driving a horse and buggy when he goes to see his best girl, and that old "Dobbin" will get him there just as quick as a "31" model automobile. This chap claims that because he has invented a special whip and the superior knowledge he has of driving a horse that he acquires as great speed and gets there as quickly as if he were driving an automobile. This chap is about as modern and truthful as the business college man who claims that with the "old time" system of shorthand he is teaching that he can give you a shorthand course in four months, or a combined course of bookkeeping and shorthand in five months. It is a well-known fact that the authors of the shorthand and bookkeeping system he is teaching recommends from five to seven months be used in completing either of these two courses combined. The five Byrne Commercial Colleges are the only schools in the Southwest permitted to use the Famous Byrne Simplified Shorthand and Practical Bookkeeping. They are, therefore, the only schools that can give you a complete, thorough, and modern course and save you from three to five months time over that required in other schools teaching other systems. The salary earned in the time the Byrne Colleges save you will more than pay the cost of your entire course to say nothing of the expense of board and room they save you during these three to five months that you would still be going to school, if you were attending another school teaching other systems. There are over 50,000 former students of Byrne Shorthand and Bookkeeping that will tell you that you should attend a Byrne Commercial College, who hold the exclusive teaching rights of these modern systems, and enjoy the advantages of the Famous Byrne Simplified Shorthand and Practical Bookkeeping.

As business swings back to normality you are bound to realize that those best trained for modern business will have the first opportunity to get on the pay roll with big business. Those with lesser business training or none at all will have a long wait before they will find satisfactory employment, if ever. Insure yourself against having to remain in the long line of untrained waiting for a position by enrolling now and

completing a thorough business course in one of the Byrne Commercial Colleges.

Fill in Name ..... and Address ..... and mail to the Byrne Commercial College of your choice, either in Dallas, Houston, San Antonio, Fort Worth, or Oklahoma City.

Every German-language speaking family should have a German newspaper. The Freie Presse fuer Texas is the leading weekly newspaper printed in the German language published in Texas. It is sold at the low price of \$2.00 per year and by remitting for it, either new or renewal subscription, through this office you can get both the Freie Presse and Farming a whole year for the price of the Freie Presse alone. Send your \$2.00 today to Farming, Hondo.

## RUPTURE

E. J. MEINHARDT  
OF CHICAGO  
IS COMING HERE AGAIN

He will personally demonstrate his method without charge at the Gunter Hotel, San Antonio, Texas, on Thursday and Friday, Dec. 10th and 11th, from 10:00 A. M. to 5:00 P. M. daily. Only men invited. Caution—Do not wear trusses, pads, plasters, or devices that often weaken the muscles, and do not submit to avoidable operations which often fail repeatedly.

Rupture often causes Stomach Trouble, Backache, Constipation, Nervousness, general weakness and other ailments. Hundreds of deaths from rupture can be avoided.

Notice—This is the only city he will visit in this section. Please note the above date carefully and come to investigate.

(This visit is for white people only.)—E. J. Meinhardt Co., Home Offices: Whitehall, Michigan, and Chicago.

Carlot shipments for the past two weeks from the local station are one car of mules, 11 livestock, five of cottonseed and five corn. Cotton shipped up to date for this season is 1359 bales as compared with 1525 bales up to a like date last year.

The Baptist Badgers play their initial game of basketball with the Knippa squad, Friday night at 7:30 at the Fair Grounds. Both sides are boasting good teams, so a good game is assured.

WORK WAGES AND THE SOVEREIGNTY OF GOVERNMENT.

There is one distinction which the advocates of "the right to work" fail sometimes to make. No one doubts a man's right to work, but that does not mean that he has a right to demand either the government or anybody else to hire him to work. Nobody is under any sort of obligation to hand out jobs to men just because they are idle. No idle man has any right to demand a job at the hands of another man.

It is not only the right of every man to work, but it is his duty to work. If the other man has no job, he must make one for himself either on the farm or in the shop. He has no right to sit around and look for a job, or wait for one to come to him.

But if there is work which the government needs to have done, then it is the duty of the government to proceed to have that work done, thus giving employment to all the men needed and thus paying the worker's proper wages on which to live decent and honorable lives.

Under our present financial system, the government, as well as individuals, are blocked from the duty of making improvements until the money necessary is borrowed with interest from our gold-owning bankers and money lenders. The government itself cannot do its plain duty until it makes satisfactory terms with some private money lenders.

If these lenders do not desire the work to be done as contemplated by the government, they have the power to say "no, we will not lend you the money", and then the government is stilled, and cannot move till the money lenders say move. This is an ignoble state of government. This disgraces the government. This shows the existence in the government of a power superior to the government itself.

What a miscarriage of justice it is when the government must back down and refuse to do its plain duty because it is under the ban of private interests that are able to dictate the things it should do! That is what is the matter with the nation today in this time of awful depression. Our government should not be under the dictates of the money lenders. They should be under the dictates of the government. The government stamps their money and turns it over to them just when they call for it. Their money is not money at all till the government first stamps its fiat upon it, and yet our misguided congress has given to them the power to refuse, even to lend that money back to the government if they choose to do so.

Our misguided government has chosen not to stamp money for itself but to stamp it for the gold-owners; and then let them dictate the terms by which the government and the people can use that money when it is needed to relieve the dire calamities that are now upon us.

Now is the time for our congressmen to assert the sovereignty of their government in the stamping of its own money for its own needs, and

make service, instead of gold the basis of that money issue. No longer should the great United States Government cringe at the behest of a grafting gold owning oligarchy and be held up in its benevolent and progressive designs in the interests of human needs.

Soldiers should be paid for their services, and workers should be paid for other services in which the good of all humanity is involved and no private set of gold owners should be allowed to handicap the government in its efforts at justice and human betterment.

### Take the Right Route

The rich can spend money and last quite a while. Can live in great splendor and put on the style; But the rich have license to live rather high. While those without means had better not try. So if you are trying to live like the rich, And you are not able, then you better switch To the manner of living your income will bear. Those who mimic the rich never get anywhere. The Hondo State Bank has found beyond doubt When you live too high you take the wrong route.

TEXAS AND TEXANS.  
By  
Will H. Mayes  
"All Texans for All Texas"

"Great To Be A Texan"  
The Austin American gives a few  
of the reasons why Texans are  
thankful. Fifty million containers  
will be filled with meat, vegetables  
and fruit in 1931 by Texas farmers,  
and millions left over from last  
year. Twice as many hives and  
bees have been canned as ever be-  
fore. Range conditions are first  
class. Land is in fine shape for  
winter grain crops. Cattle, horses,  
sheep, goats, hogs, poultry are in  
fine condition. Granaries are  
overflowing, barns are well filled,  
and attacks are seen everywhere.  
Farmers are going in strong for  
canning. Poultry shows are crowd-  
ing. Turkey market is good.  
Farm houses and barns are being  
improved. Farmers are showing in-  
terest in State and local affairs, in  
the naming of officials, in reducing  
expenses of government, in living  
within their means, and much as  
possible, from the products of their  
farms. All these things assure  
prosperity.

**Banks Reorganizing**  
More than a dozen closed banks  
have been reopened in Texas in  
the past month and more will be  
opened soon. Most of these should  
never have been closed and would  
not have been but for idle and un-  
founded rumors. The closing of any  
bank creates, to a certain extent,  
disturbance in other banks, and people  
become panicky and rush to the  
banks for their money. If the  
closing of Texas banks results in  
closer supervision of the banking  
business in the future, the lesson  
will be worth all that it has cost  
the bankers. Many banks have been  
too eager and too reckless in making  
large profits for their stockholders.  
Twenty to twenty-five per cent  
dividends have been earned by  
many, and in many cases, this has  
been at the expense of that safety  
that should characterize all banking.  
No country can prosper whose  
banks do business on unsound  
methods. What the people want, and  
what the National and State bank-  
ing laws should guarantee is close  
supervision of all banks to  
protect alike the interests of stock-  
holders and depositors.

**Make It Official**  
Texas will have a Centennial cele-  
bration of some kind in 1936. Dal-  
las is claiming it, because it now  
has the most successful State fair  
in the country and has at least the  
beginning of a State Centennial  
plant. The last legislature endorsed  
the Centennial movement "in prin-  
ciple" by submitting a constitu-  
tional amendment to the people to al-  
low appropriation of State funds  
for its support. It also provided for  
a committee to make a close study  
of the entire question of Centennial  
celebrations and report its recom-  
mendations to the legislature for  
further action. That committee  
may or may not recommend that  
the Centennial be held at Dallas. It  
may not recommend State support  
of the movement, but at least the  
committee should be created and  
should be allowed to function, and  
as early as possible. If it does not,  
a dozen places may soon be form-  
ing local companies to hold Texas  
Centennial celebrations, none of  
which would likely do credit to the  
greatness of Texas. Texas needs a  
united effort for a movement that  
can be made to reflect the real  
greatness of the State. Why the  
delay on the part of the Governor,  
the Lieutenant Governor and the  
Speaker of the House in carrying  
out the instructions of the legisla-  
ture? Official State action is need-  
ed if the Centennial is to be a  
success and any delay unnecessarily  
impairs that success.

**Farm Food Supply**  
The extension department of A.  
M. College claims that the food  
requirements of a farm family of  
five can be supplied from a quarter-  
acre garden, two dairy cows, 40 pul-  
lets, a half acre home orchard, a  
brood sow and a few sheep and  
calves. Two cows are needed to  
furnish at different seasons. Three  
hundred baby chicks should be  
hatched from which may be ex-  
pected 200 birds, half cockrels and  
half pullets. A home canning out-  
fit is essential. These items repre-  
sent \$600 a year in food values.  
Anything raised on the farm above  
that can be used or other expense  
items, such as clothing, equipment,  
taxes, insurance, bank account. If  
you are a farmer and have no bet-  
ter working plan, why not try this  
one?

**Texas Turkey Market**  
The Texas turkey crop has reach-  
ed vast proportions. From many  
towns from 15 to 40 cars have al-  
ready been shipped and it is esti-  
mated that not more than half the  
total supply has been marketed. A  
car of turkeys represents from \$3,  
000 to \$4,000 paid to the farmers.  
Besides the car shipments many

are sent out by express and by  
trucks. Large numbers are sold on  
foot to local markets and for home  
use. The growers always reserve a  
few of the choicest for their own  
tables and for breeding for the next  
season. In recent years prudent  
housewives double their sale value  
by canning the birds of second  
grade. The Texas farm without  
turkeys and chickens is one whose  
owners are careless as to their own  
interests.

**Japan Buys Much Cotton**  
Nearly 2,000,000 bales of Texas  
cotton have been bought for ship-  
ment to Japan. Some see in this  
preparation on the part of that gov-  
ernment for a long war. Others  
think that Japan, knowing that  
the investment is a good one,  
is merely taking advantage of  
present low prices. Despite all  
the roseate promises of politicians  
in framing cotton acreage re-  
duction laws, the price of cotton  
has not been perceptibly increased  
since the reduction agitation began.  
Cotton is low and will continue low  
until the surplus is visibly reduced  
almost to the extent of being wiped  
out.

**Heavy Truck Shipments**  
Reports from Llano are that two  
trucks from St. Louis have been  
loaded with 90,000 pounds of pec-  
ans and have gone back over the  
highways of Texas and other states.  
Shipments of these proportions are  
ruining the highways of this coun-  
try and destroying the business of  
the railroads. The regulation of  
freight transportation by truck is  
of vast importance to the people  
who build and maintain the roads,  
as well as to those who own and  
operate railway lines built at their  
own and not at State expense. There  
is something wrong with the gov-  
ernmental machinery that is inade-  
quate to protect government prop-  
erty.

**Laredo Oil District**  
While the East Texas oil district  
admittedly is now the largest in  
the country in production and ap-  
pears to be susceptible of almost  
unlimited development and the  
West Texas oil area seems to have  
no bounds, these are by no means  
the only oil fields in Texas. From  
Amarillo to Laredo there appears  
to be an almost unbroken oil ter-  
ritory. The Laredo district of our  
country has produced 30,000,000  
barrels of oil over a period of ten  
years and is still going strong with  
a daily output now of 15,781 bar-  
rels or about 475,000 barrels a  
month, which is above the East  
Texas allowable. The average out-  
put per well in the Laredo district,  
though, is small, being only 16.1  
barrels daily per well, which assures  
wide distribution of operating and  
royalty incomes.

**Potash Refining Methods**  
Dr. E. P. Schoch, well known  
chemist of the University of Texas,  
announces that after years of  
experimentation he has discovered  
a new method of refining the huge  
potash deposits of West Texas by  
a process commercially practicable.  
Process heretofore in use have  
been too expensive. By the new  
method the potassium sulphate not  
only is obtained more cheaply, but  
the residue is rendered valuable.  
Texas potash deposits are said to  
be among the largest and most  
valuable in the world. The potas-  
sium sulphate is highly valued, as  
is also the residue, which is 90 per  
cent gypsum.

**Slaughter Of Bucks**  
Over 600 deer were killed in Kerr  
county the first three days of the  
deer and turkey hunting season.  
The number of wild turkeys bagged  
in the same period was estimated  
at 350. The hunters are largely from  
the cities of Texas and other States  
attracted to the hill country by re-  
ports of the large number of deer.  
Most of them own or acquire hun-  
ters' rights to privately owned lands.

**Tax Collections Large**  
Despite the fact that by paying  
one-half the State and county taxes  
by Nov. 30 the other half may  
be deferred until June 30, tax col-  
lectors of most Texas counties re-  
port collections larger than at the  
same period last year, showing that  
the people have more money with  
which to pay.

**MAGAZINE IS PAL OF BOYS.**

Those boyhood years between the  
ages of ten and twenty are the im-  
pressional years—the formative years  
when the fundamental character of  
a boy is molded into the pattern it  
will maintain throughout the remain-  
der of his life.  
That is why so much importance  
is placed on the factors that govern  
the lives of adolescent boys—their  
companions, their environments, their  
reading, the food they eat, etc. At  
this age is determined whether the  
boy will develop into a cheerful or  
sullen man, generous or selfish, in-  
tellectual or dull, ambitious or indolent.  
School teachers, librarians, Scout  
leaders and others engaged in boy  
activities have found that THE  
AMERICAN BOY—YOUTH'S COM-  
PANION magazine is one of the  
most favorable influences a boy be-  
tween ten and twenty can have. Its  
stories and articles are a force for  
good—wholesome, alive, inspiring.  
The million or so boys who read  
this magazine every month consider  
it their closest friend. In it they find  
the keenest entertainment, adventure,  
mystery, athletics, aviation, humor,  
everything that delights a live wire  
American boy. Its sports articles  
by famous coaches and athletes help  
boys win places on their school teams.  
Its professional articles and biograph-  
ical sketches aid them in select-  
ing their life's work. Its keenly an-  
alytical editorials guide them in their  
daily problems.

That boy or young man in whom  
you are interested would have a world  
of pleasure reading THE AMER-  
ICAN BOY—YOUTH'S COMPANION,  
550 W. Lafayette Blvd., Detroit,  
Michigan.

**WHEN  
FOOD SOURS**

ABOUT two hours after eating  
many people suffer from sour  
stomachs. They call it indigestion. It  
means that the stomach nerves have  
been over-stimulated. There is excess  
acid. The way to correct it is with an  
alkali, which neutralizes many times  
its volume in acid.

The right way is Phillips' Milk of  
Magnesia—just a tasteless dose in  
water. It is pleasant, efficient and  
harmless. Results come almost in-  
stantly. It is the approved method.  
You will never use another when  
you know.

Be sure to get the genuine Phillips'

physicians for correcting excess acids.

## KELLER-TSCHIRHART.

A beautiful wedding took place Tuesday, Nov. 24, 1931, at 9:30 o'clock at St. Louis Church when Miss Cecelia Tschirhart became the bride of Mr. Frank Keller, Jr. Rev. J. Lensen performed the ceremony which was followed by a Nuptial Mass.

Miss Octavia Keller was maid of honor and Miss Gertrude Noonan was bridesmaid. They were dressed in lovely turquoise blue crepe and carried bouquets of pink carnations. The groomsmen were Hugo Tschirhart and Edwin Conrad.

The bride's frock was of beautiful white satin and lace and her veil was

## 3 RULES big help to BOWELS

What a joy to have the bowels move like clockwork, every day! It's easy, if you mind these simple rules of a famous old doctor:

1. Drink a big tumblerful of water before breakfast, and several times a day.
2. Get plenty of outdoor exercise without unduly fatiguing yourself.
3. Try for a bowel movement at exactly the same hour every day.

Everyone's bowels need help at times, but the thing to use is Dr. Caldwell's Syrup Pepsin. You'll get a thorough cleaning-out, and it won't leave your insides weak and watery. This family doctor's prescription is just fresh laxative herbs, pure pepsin, and other helpful ingredients that couldn't hurt a child. But how it wakes up those lazy bowels! How good you feel with your system rid of all that poisonous waste matter.

rather intelligent. Many of our members are talented. Some are capable of writing a class poem, will, prophecy, or history. Some are capable of giving vocal or instrumental numbers to complete the program.

We might have a special edition of "The Owl" for the Seniors and see that each would get a copy to keep. In this could be put the Class Night and Commencement Night addresses and other news or other things the Seniors would like to remember.

When we have graduated, we shall all go our own way, and probably most of us will go to places other than Hondo. It seems as though we might have this last night of fun together to remember always.

## SPANISH CLUB MEETING.

El Circulo de Espanol met for the first meeting of this year on Tuesday night, November 17. This meeting was held for the purpose of organizing the club and initiating the new members. There were thirteen to be initiated and they all came through alive, happy, and ready to go again. The most enjoyable part of the initiation was the serving refreshments which consisted of clay and chili pepper pies, chocolate covered garlic, and sulphur sandwiches. A pie eating

## CLASS NIGHT.

The senior class of 1932 should, along with their other activities, have a Class Night. When I was smaller, I used to long for the time when I should be a senior, and one of the things I liked most about being a senior was the reading of the class prophecy, will, poem, etc. For several years, the Hondo High graduates have not had this privilege of having a night set apart for them in which they could make merry, a night for them to remember always. On Class Night the dignified Seniors lay aside their dignity and just have fun.

Our senior class is small, but it is

contest was held and for once Jack Mask did not compete. Mary Ruth Wilson won the prize which was something that I won't attempt to tell you about because I cannot spell it.

After the initiation was over, a business meeting was held and the following officers were elected: Jack Muennink, President; Lucy Davis, Vice president; Lucille Van Fleet, Secretary-Treasurer; and Edward Taylor, Sergeant-at-arms. The program committee for the next meeting was then chosen. The program committee consists of Mary Ruth Wilson, Chairman, Gladys Fusselman, Bernice Chancey and Tunselda Wurzbach.

Refreshments consisting of apples, crackers, jaw-breakers and lemonade, were then served to about thirty-six members, both new and old.

## HONDO OWLS LOSE TO PEARSALL MAVERICKS.

On Friday, November 20, the Hondo Owls met defeat at the hands of the Pearsall Mavericks by the score of 7 to 0. This was the Owls' last game of their 1931 season and also a conference game.

At the opening of the game the Owls kicked off to the Mavericks and stopped them after a march of about forty yards to the Owls' thirty yard line. The Owls then took the ball and carried it to the Mavericks' twenty-two yard line where they lost it on downs. The Owls tried to pass it across but their passes though working fairly good were not at their best as in former games. The first half was an offensive half more than a defensive one as the ball was carried up and down the field by both teams. Neither of the teams seemed to be able to score on their opponents although both teams had the chance several times. The half ended 0 to 0 with Pearsall having the ad-

vantage in first downs.

The third quarter ended with the score still 0 to 0 but with the Mavericks on the Owls' four yard line. At the beginning of the fourth quarter the Mavericks punched the ball across for the only touchdown of the game, Malone carrying the ball. The extra point was kicked, making the score 7 to 0 in favor of the Pearsall Mavericks. Thus the game ended with the Owls making a last effort to score on the Mavericks and tie the game if they could.

The Owls played a fairly nice game taking into consideration that their first string tackle and end, Stiegler and Rucker, were out of the game and that the feather weight Owls were pulling against the beefy Mavericks.

## LION'S BANQUET.

# When TEETHING makes HIM FUSSY

One of the most important things you can do to make a teething baby comfortable is to see that little waste matter promptly and regularly. For this nothing is better than Castoria, a pure vegetable preparation specially made for babies and children. Castoria acts so gently you can give it to young infants to relieve colic. Yet it is always effective for older children, too. Remember, Castoria contains no harsh drugs, no narcotics—it is absolutely harmless. When your baby is fretful with teething or a food upset, give a cleansing dose of Castoria. Be sure you get genuine Castoria with the name!
